Compliance through Informed Consent: Semantic Based Consent Permission and Data Management Model

Kaniz Fatema, Ensar Hadziselimovic, Harshvardhan
Pandit, Christophe Debruyne, Dave Lewis, Declan
O'Sullivan

ADAPT Centre, Trinity College Dublin

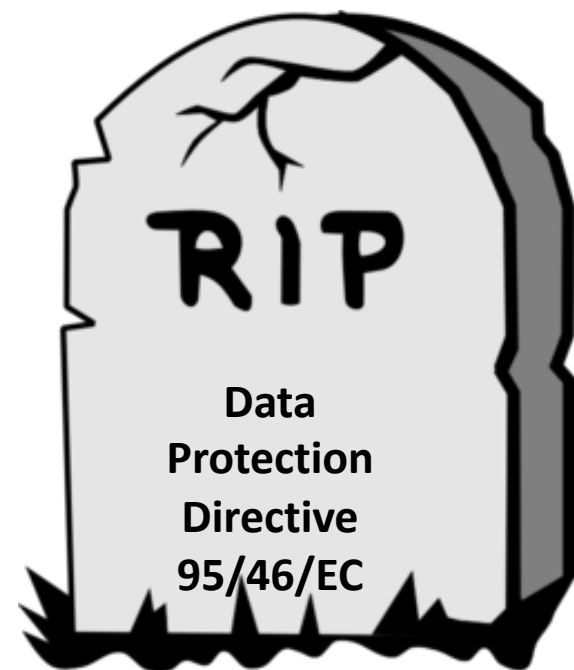

The ADAPT Centre is funded under the SFI Research Centres Programme (Grant 13/RC/2106) and is co-funded under the European Regional Development Fund.

Data Protection Directive 95/46/EC needed reform to be fit for

- technological developments like social networks and cloud computing
- globalisation.

EU has replaced DPD with General Data Protection Regulation (GDPR)

GDPR will have immediate effect on all 28 EU Member States on 25 May 2018.

International reach: data about any EU citizen

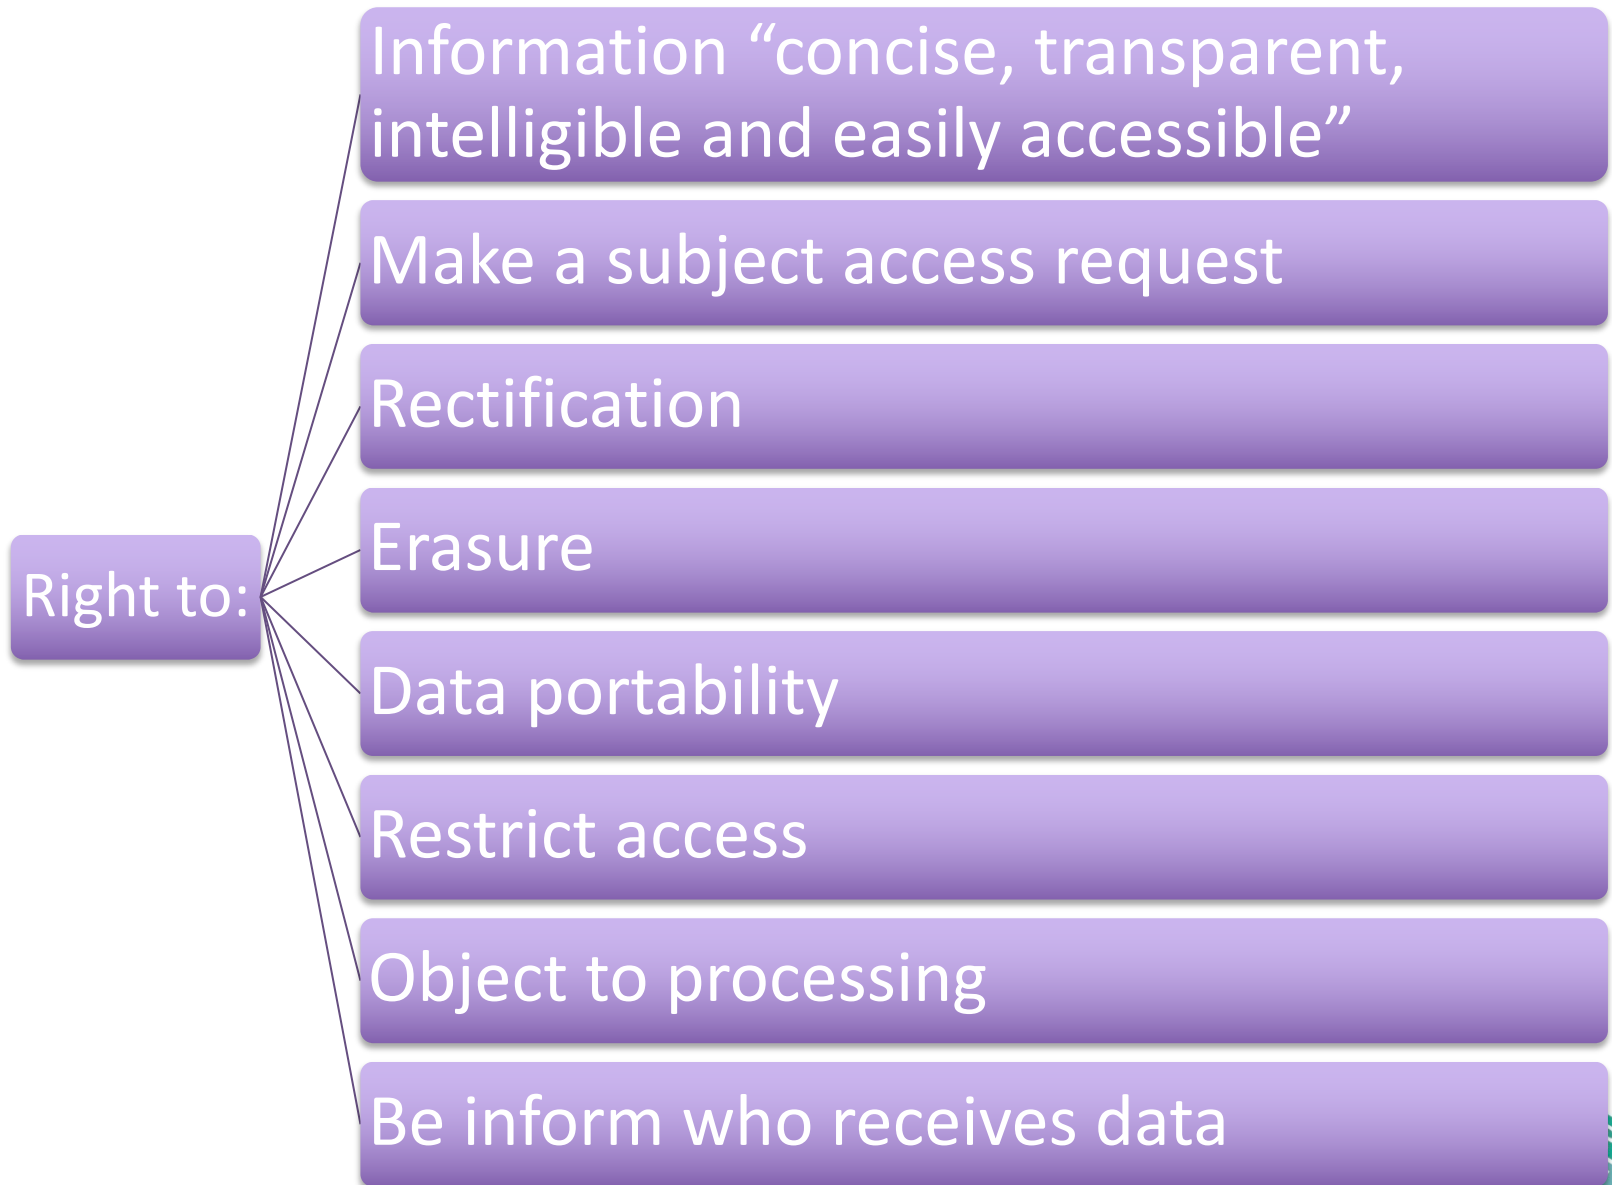

Fines upto €20M or 4% of global turnover

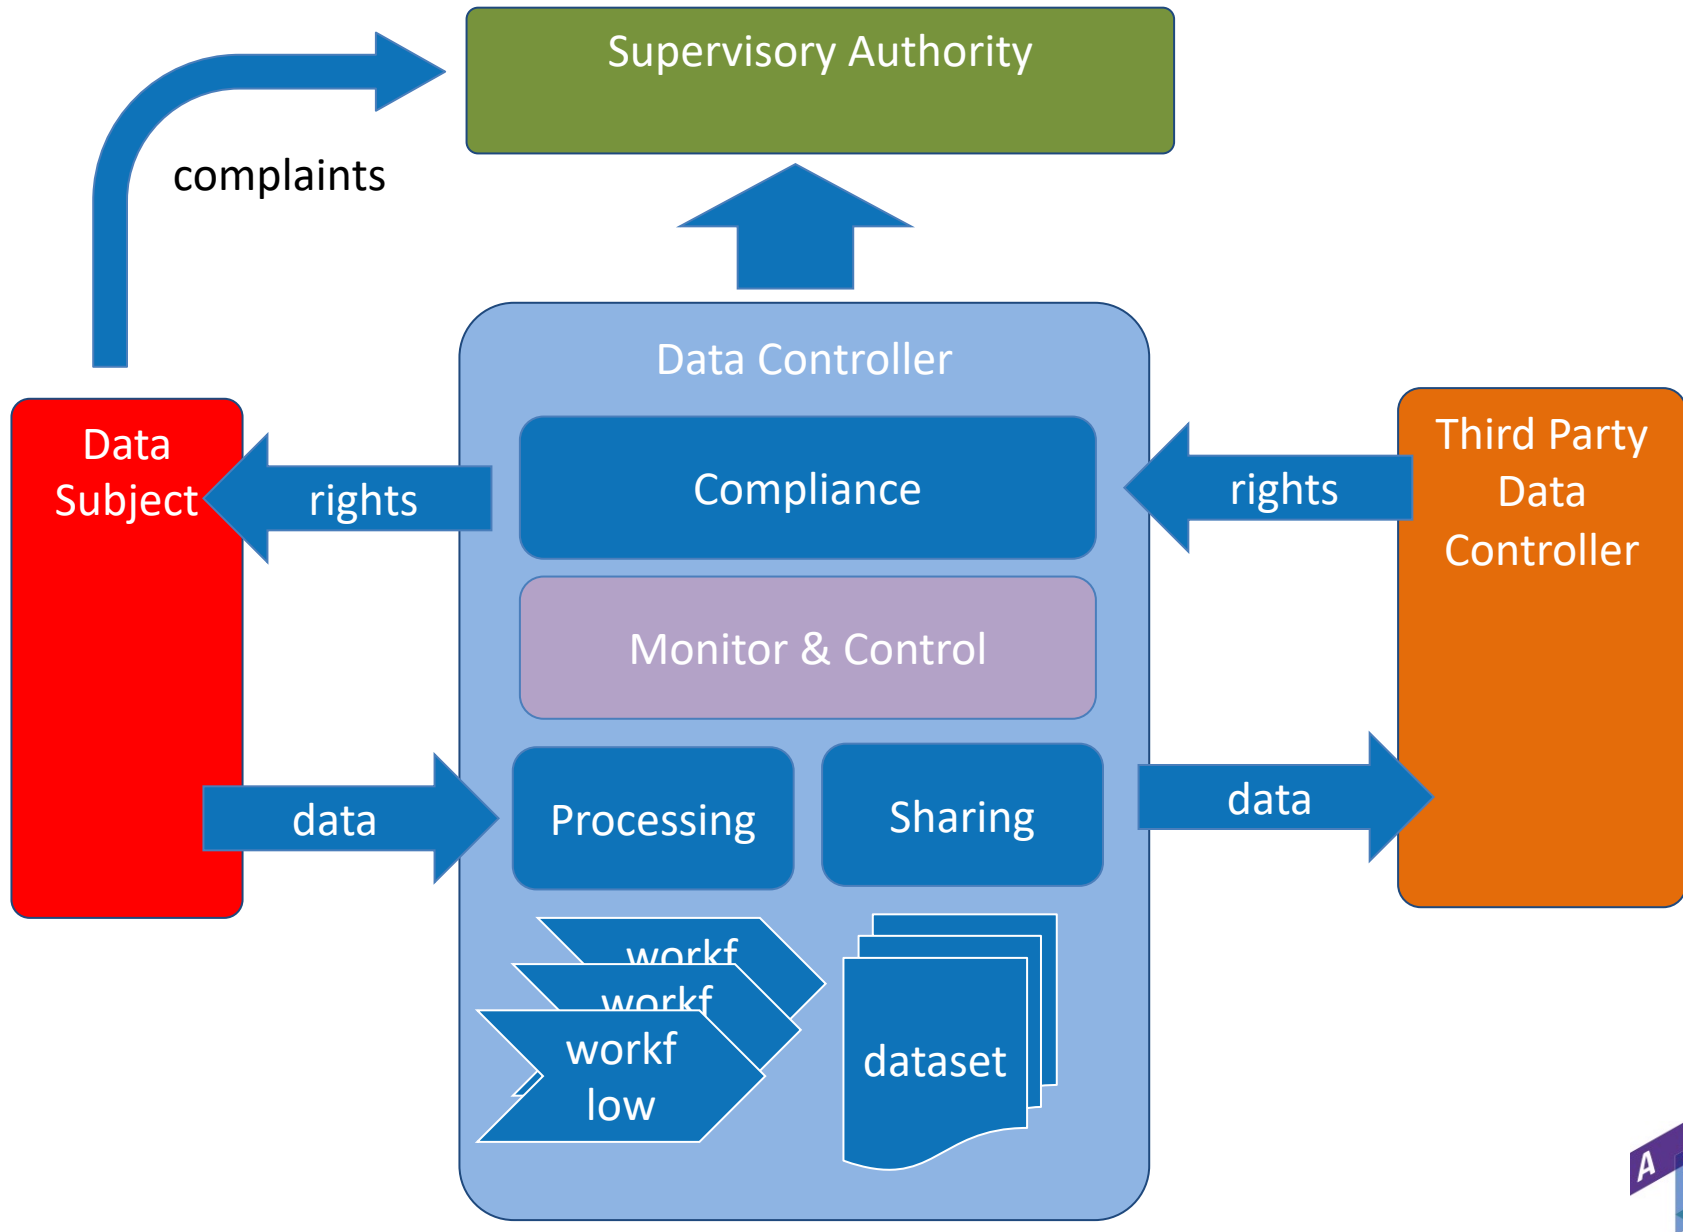

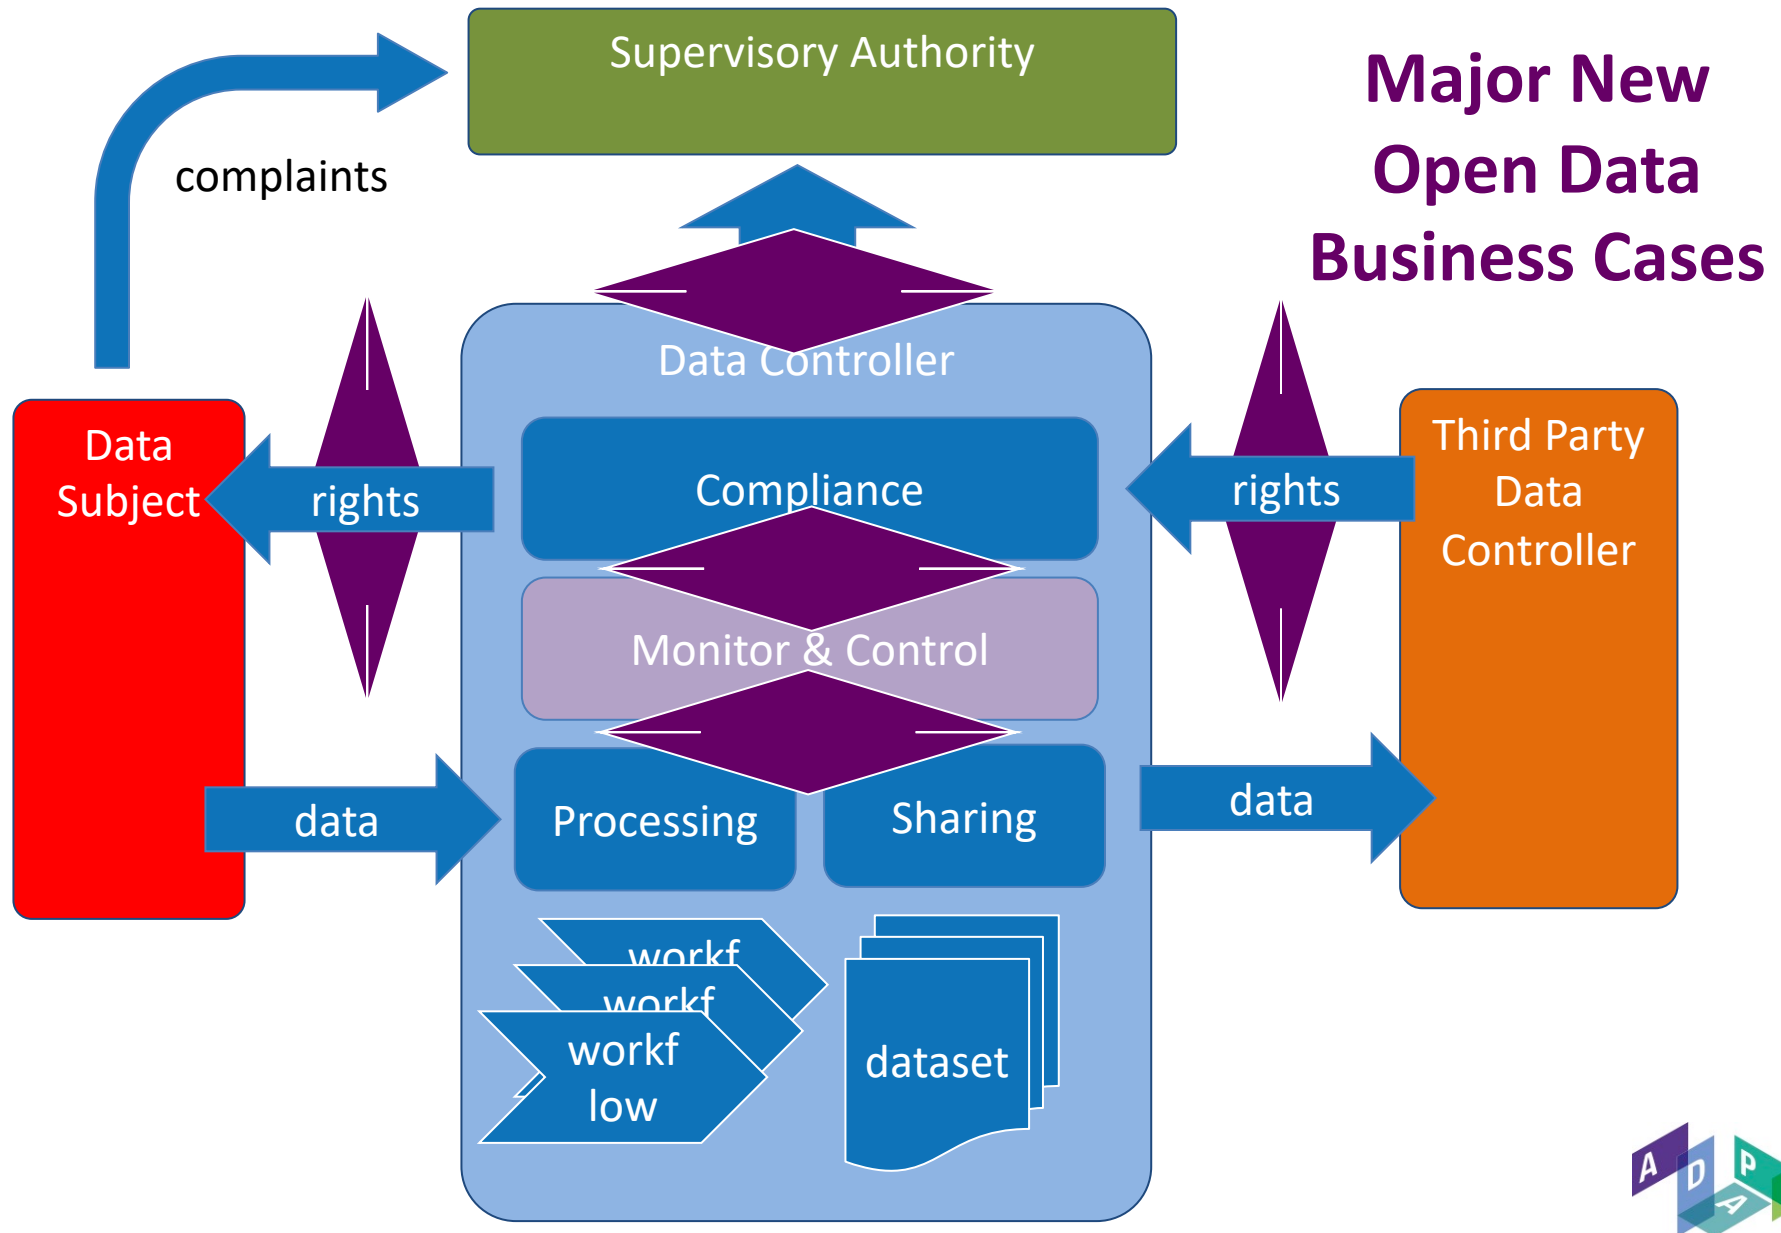

Must Demonstrate compliance

Processing lawful only through Informed Consent

To be considered as a valid one
the consent should be:

- ✓ **Freely given**
- ✓ **Specific**
- ✓ **Informed**
- ✓ **Unambiguous**
- ✓ **Parental permission**

- ✓ **If purpose or recipients change
new consent must be sought**

Silence ≠
Consent

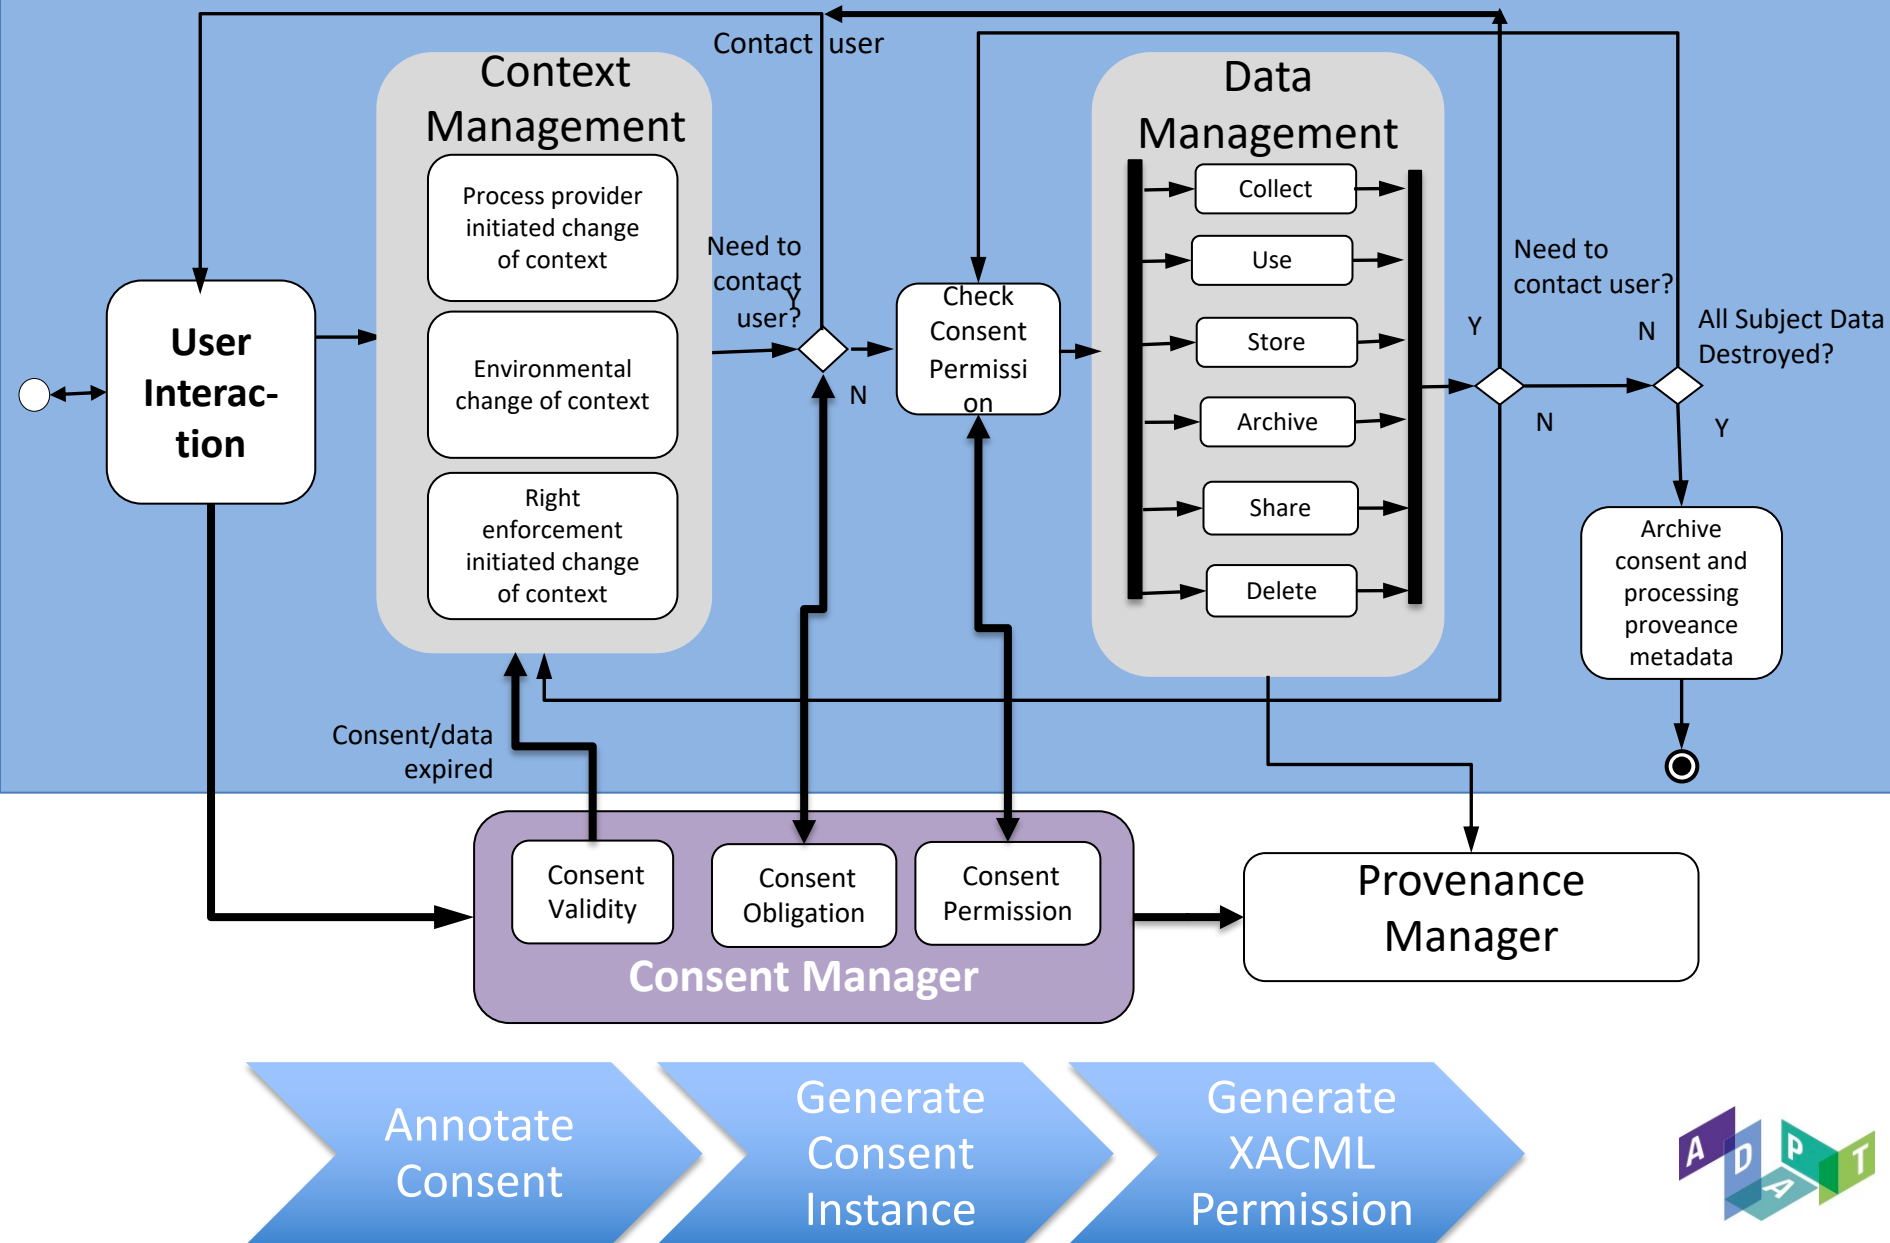

IF IT'S NOT
CLEAR
IT'S NOT CONSENT

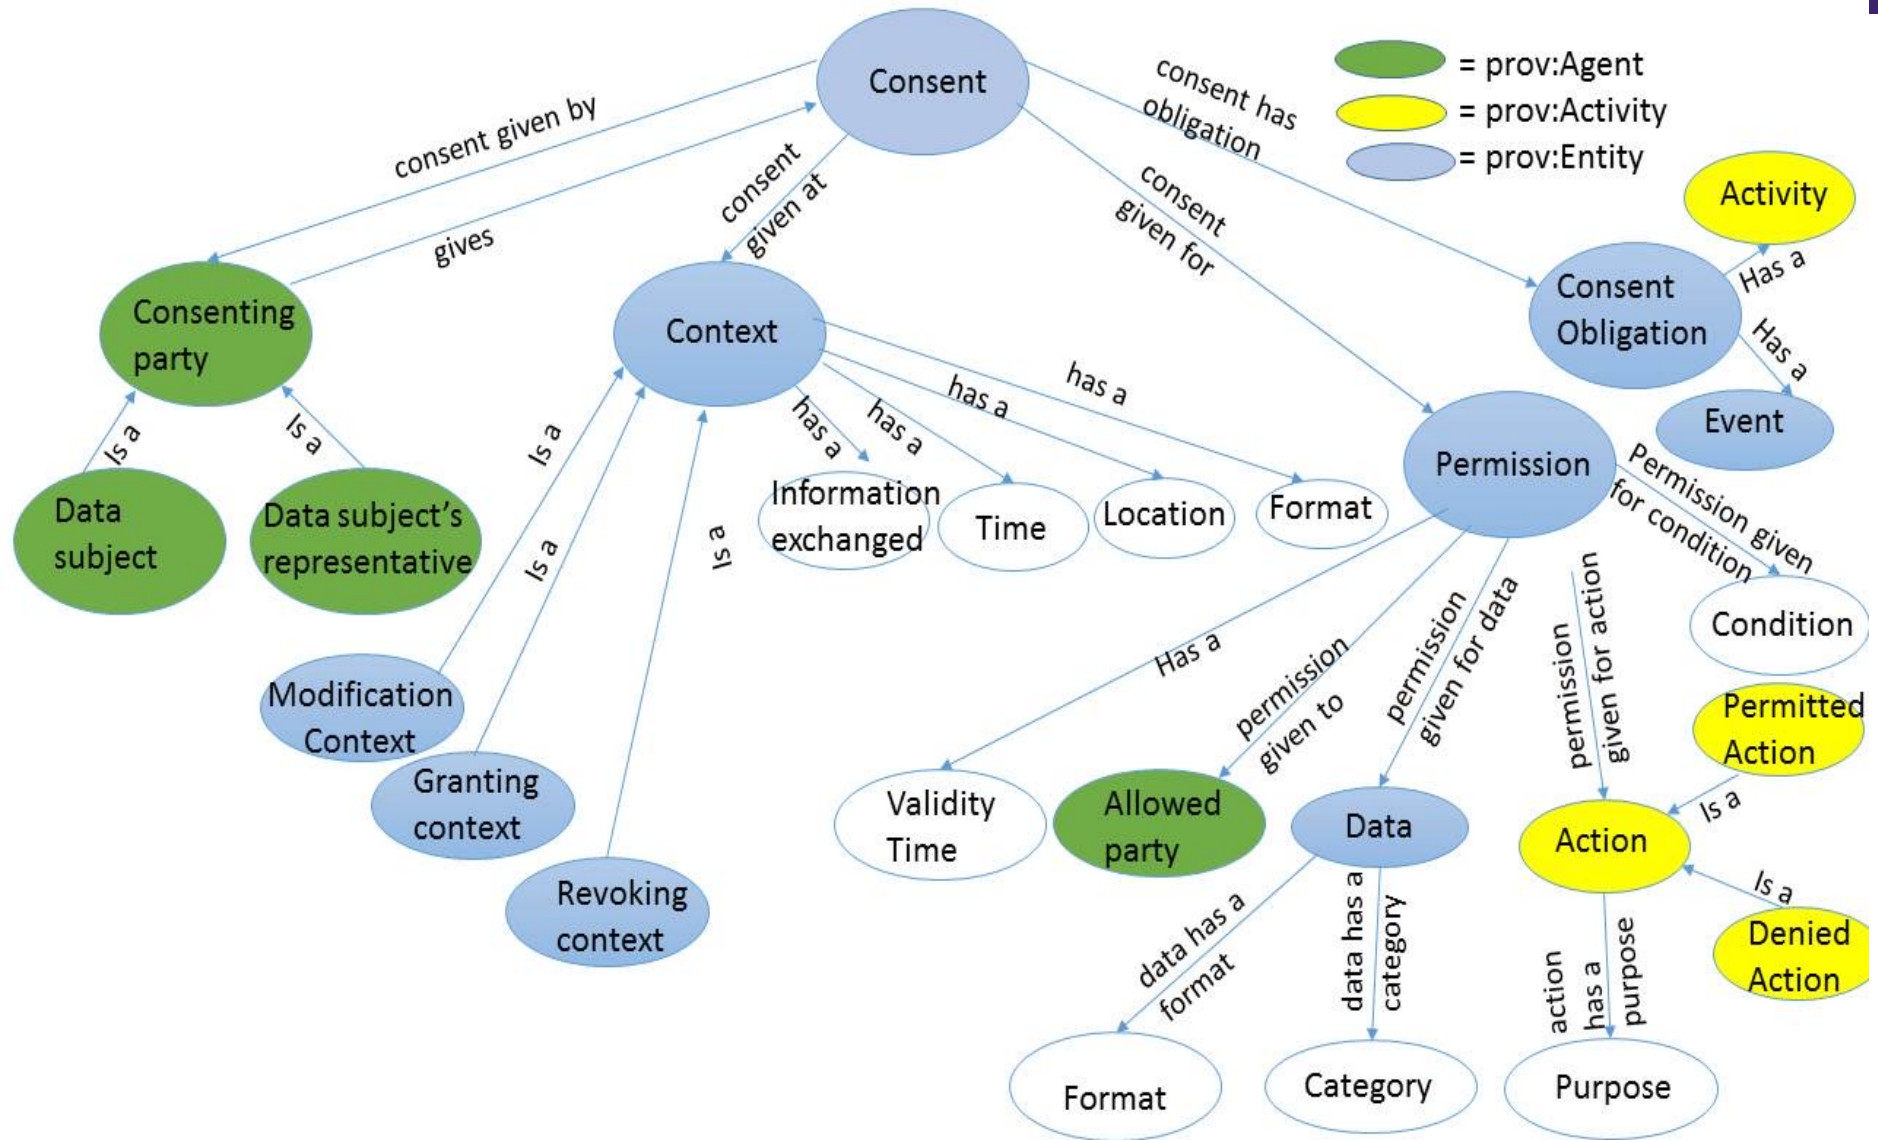

Data Lifecycle

Consent Lifecycle

I agree that my data will be used for scientific purposes

```

- GDPR implies a *full lifecycle management of consent* that encloses the lifecycle management of personal data
- *Open Data Formats* give us the tools to handle Consent as a first class object in Data Protection Management
- Explored the generation of XACML permissions from human readable consent via RDF instance
- Future Work:
 - Assessing generation of access control rules against consent forms and privacy policies
 - Integration with PROV for compliance tracking
 - Integration with ODRL for third party compliance agreements
